

**AMENDED PROSPECTUS – ALTERATION
PATRICK V. McNAMARA FEDERAL BUILDING GARAGE
DETROIT, MI**

Prospectus Number: PMI-0133-DE20
Congressional District: 14

FY 2020 Project Summary

The General Services Administration (GSA) proposes a repair and alteration project for the Patrick V. McNamara Federal Building garage located at 477 Michigan Avenue in Detroit, MI. The proposed project will complete critical structural and related system upgrades to the parking garage, correcting serious life safety deficiencies and operability issues of the rapidly deteriorating garage.

FY 2020 House and Senate Committee Approval Requested

(Additional Construction and Management & Inspection)..... \$6,951,000¹

This prospectus amends Prospectus No. PMI-0133-DE17, and requests approval of an additional \$6,951,000 to account for refined scope and cost escalations.

FY 2020 Committee Appropriation Requested

(Design, Construction, and Management & Inspection)..... \$17,671,000²

Major Work Items

Superstructure demolition and repair / replacement; fire protection upgrade; electrical plumbing, heating, ventilation, and air conditioning (HVAC), replacement/upgrades

Project Budget

Design	\$1,098,000
Estimated Construction Cost (ECC)	15,518,000
Management & Inspection (M&I)	1,055,000
Estimated Total Project Cost (ETPC)	\$17,671,000

*Tenant agencies may fund an additional amount for alterations above the standard normally provided by GSA.

¹ Prospectus No. PMI-0133-DE17 was approved by the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Environment and Public Works of the Senate on May 25, 2016, and May 18, 2016, respectively for a design cost of \$1,058,000, an estimated construction cost of \$8,822,000, and a management and inspection cost of \$840,000 for an estimated total project cost of \$10,720,000.

² GSA was unable to fund the approved FY2017 repair and alteration project within the enacted level of the President's FY 2017 Budget.

Schedule

<u>Schedule</u>	Start	End
Design and Construction	FY 2020	FY 2024

Building

The McNamara Federal Building, built in 1972, is 27 stories above grade with two basement levels, a mezzanine, and a rooftop mechanical penthouse. The garage, which abuts the Federal building, was also constructed in 1972 and provides mission-critical parking for Federal agencies housed in the McNamara Federal Building. The five-story, steel-reinforced-concrete garage structure is approximately 119,000 gross square feet with 216 parking spaces. Three of the five levels are below grade, one level is at grade, and one level is above grade. There is an entrance from the second level of the garage to the basement of the Federal building.

Tenant Agencies

Department of Justice: Federal Bureau of Investigation, Executive Office for Immigration Review; Department of Veterans Affairs–Veterans Benefits Administration; Department of Homeland Security: Office of the Secretary, U.S. Immigration & Customs Enforcement, Customs and Border Protection Field Operations Facilities, National Protection and Programs Directorate–Federal Protective Service; United States Secret Service; Department of Defense–U.S. Army Corps of Engineers; Department of Housing and Urban Development–Office of the Secretary; Social Security Administration; Equal Employment Opportunity Commission; National Labor Relations Board; Small Business Administration; Congress–U.S. Senate; Department of the Treasury–Treasury Inspector General for Tax Administration; and Railroad Retirement Board.

Proposed Project

The project includes repair/replacement of portions of the concrete slab as well as removal of the asphalt driving surfaces and replacement with concrete surfaces. A waterproof membrane will be installed to protect the structural concrete from water infiltration, and the exterior concrete stairs will also be repaired. The project also includes improvements to the storm drain, mechanical infrastructure including the exhaust ventilation system, electrical and lighting and fire and life safety systems, and replacement of signage. Due to the extensive and disruptive nature of the proposed repairs, the garage will be closed for the duration of the project, and all of the official Government vehicles will be relocated to temporary leased, off-site parking. Shuttle service will be provided to and from the McNamara Federal Building for those tenant agencies whose parking will be displaced during the repairs.

**AMENDED PROSPECTUS – ALTERATION
PATRICK V. McNAMARA FEDERAL BUILDING GARAGE

Prospectus Number: PMI-0133-DE20
Congressional District: 14

Major Work Items

Superstructure Demolition and Repair/Replacement	\$13,170,000
Fire Protection Upgrades	910,000
Electrical Replacement/Upgrades	771,000
Plumbing Replacement/Upgrades	445,000
HVAC Replacement/Upgrades	<u>222,000</u>
Total ECC	\$15,518,000

Justification

The garage provides mission-critical parking for Federal agencies housed in the adjacent McNamara Federal Building, including secure parking for Federal law enforcement agencies. Original to the construction of the garage, the existing concrete slab structure is rapidly deteriorating with spalling concrete and rusted reinforced steel visible where sections of concrete have fallen from slabs. The asphalt-topped concrete decks are in very poor condition, with large potholes that have the potential to damage vehicles and injure pedestrians. Portions of the garage are temporarily closed due to spalling concrete and water-related degradation. Plastic sheeting is in place in areas throughout the garage to protect Government vehicles, which have been damaged by leaking corroded pipes. Interim repairs put in place over the years are also susceptible to spalling due to the continued water penetration and de-icing salts.

In addition to the needed structural repairs, the storm drain, fire and life safety, electrical and mechanical, and emergency lighting systems are all failing and are noncompliant with current codes. The majority of storm drains are cracked and inoperable, which forces water to seep through cracks in the concrete, causing further degradation of the structure. Sprinkler pipes and drain lines are corroded throughout the garage, and the incidence of failure is increasing over time. Water cannot drain properly causing water damage in occupied space of the Federal building's basement.

Shutting down the parking structure for the duration of the project allows for the completion of the repairs in one phase, thereby accelerating the schedule, reducing coordination efforts, and reducing overall project costs.

Summary of Energy Compliance

This project will be designed to conform to requirements of the *Facilities Standards for the Public Buildings Service*. GSA encourages cost effective design opportunities to increase energy and water efficiency above the minimum performance criteria.

Prior Prospectus-Level Projects in Building (past 10 years)

None

Alternatives Considered (30-year, present value cost analysis)

There are no feasible alternatives to this project. This is a limited scope renovation and the cost of the proposed project is significantly less than the cost of leasing or constructing a new building.
